Jesus Mendoza

Full Stack Developer | Next.js · Express · PostgreSQL | Building Web Apps & Booking Systems for Businesses
Mérida, Yucatán, Mexico

Summary

I'm a Full Stack Developer based in Mérida, Mexico, who loves diving deep into problems and building solutions that actually work. I specialize in creating real-world applications for businesses, from full-featured booking systems to responsive landing pages. I thrive when breaking big problems into smaller parts, iterating quickly, and hyper-focusing on details others might miss — especially when debugging tricky issues or optimizing code. My toolkit includes Next.js, React, Express, Django, PostgreSQL, REST APIs, Tailwind CSS, and TypeScript, and I enjoy figuring out how front-end and back-end systems fit together seamlessly.

Experience

Freelance

Freelance Web Developer
September 2025 - Present (2 months)
Mérida, Yucatán, Mexico

Built responsive landing pages and small web demos for local businesses using Astro, Tailwind CSS, and JavaScript. Focused on delivering fast, clean, and mobile-friendly MVPs for clients.

Self-employed

Full-stack Developer
August 2024 - Present (1 year 3 months)
Mérida, Yucatán, Mexico

Developed multiple full-stack web applications for personal and freelance projects using Next.js, Express, Django, React, PostgreSQL, and TypeScript. Focused on building responsive UIs, clean REST APIs, admin dashboards, and booking/gallery systems with production-ready deployment to Netlify, Railway, and Dockerized environments.
